

Second week's problem set

Take user input and display a formatted output.

```
#include <iostream>
using namespace std;
int main () {
    const string initials = "What's your ";
    string first_name, second_name;
    int age;
    float height;
    cout << initials << "first name? ";
    cin >> first_name;
    cout << initials << "second name? ";
    cin >> second_name;
    cout << initials << "age? ";
    cin >> age;
    cout << initials << "height? (in Feet) ";
    cin >> height;

    std::cout <<"Your name is "<<first_name<<' '<<second_name<<'.'<<" You are
"<<age<<" years old and "<<height<<" feet tall."<<'\n';
    return 0;
}
```
