

First Week's Problem set

Initialize variables and cout them.

```
#include <iostream>

using namespace std;

int main () {
    int age = 20;
    float marks = 979;
    char grade = 'A';
    string name = "Abdul Samad";

    cout
        <<"My name is "
        <<name
        <<'.'
        <<" I'm "
        <<age
        <<" years old"
        <<'.'
        <<" I got "
        <<marks
        <<" marks out of 1100."
        <<" My Grade is "
        <<grade
        <<'.'
        <<'\n';
}
```
